

Online Infection Control Training Course & Certification **(Accredited by the International Institute of Risk & Safety Management and CPD)**

Infection prevention and control measures aim to ensure the protection of those who might be vulnerable to acquiring an infection.... Ok but why is this important?

Well every year at least 300,000 people develop a Health Care Associated Infection. This has a huge impact on the patient, the staff and the institution it occurs in. Whereas if there is good infection prevention and control, patients will have better health and more independence.

This course will start by defining infection prevention and control and explaining the impact of good and bad infection control. It then goes into detail about, the legislation that applies to infection control, the different types of microorganisms, how bacteria are transmitted, the chain of infection, and much more.

Course structure:

Course	Module Number	Module Name
Infection Control	1	The course structure
Infection Control	2	Infection prevention and control, and the impact of infection
Infection Control	3	The different microorganisms
Infection Control	4	How bacteria are transmitted
Infection Control	5	The Chain of Infection
Infection Control	6	The control and prevention of infection
Infection Control	7	Cleaning & Decontamination
